WORK EXPERIENCE

Artificial Intelligence Software Developer Intern

Ericsson Canada

Montreal, QC, Canada

Jan 2026 - May 2026

- Implemented and deployed RAG chatbot using Hopsworks, DeepEval, and EricAI models.
- Enhancing a dimensioning tool (CANDI) with AI/ML capabilities and automating the building of the prediction model.
- Designed and deployed a price-predictor tool with regex and LLM process, and trained a LightBGM model for trend prediction.

Machine Learning Intern

Ericsson Canada

Montreal, QC, Canada

May 2025 - December 2025

- Designed and deployed *Retrieval-Augmented Generation* (RAG) pipelines using AWS Lambda, Bedrock, and S3.
- Created Python-based agentic workflows to generate datasets for fine-tuning; improved workflow latency & results by ~40%.
- Designed and implemented a CLI based coding assistant using Langchain DeepAgents.

NoteTaker (Data Science course)

McGill University

Montreal, QC, Canada

Jan 2024 - May 2025

- Created organized and well-written notes for the McGill Student Accessibility & Achievement program.

RESEARCH EXPERIENCE

TBD - Summer@EPFL - EPFL SaCS Lab

with Professor Anne-Marie Kermarrec

Lausanne, Switzerland

June 2026 - August 2026

- TBD

Machine Learning algorithms & Energy efficiency - McGill DISC Lab

with Professor Oana Balmau & Professor Bettina Kemme

Montreal, QC, Canada

June 2025 - December 2025

- Instrumented Switch-Transformers and Qwen *Mixture-of-Experts* models using CodeCarbon on DeepSpeed; profiled GPU energy consumption and identified optimization strategies that reduced energy usage by ~66% without loss in accuracy.
- Prepared a project for students for a Responsible AI course, including starter code and setup based on the research project.

TikTok algorithm analysis - The Prometheus Lab

with Professor Joseph Vybihal

Montreal, QC, Canada

Sept 2024 - December 2024

- Designed Python-based bots to collect 400+ TikTok videos while bypassing scraping restrictions; conducted statistical analysis using Pandas and Scikit-learn to quantify algorithmic bias in engagement rates by user gender and content sentiment.

PROJECTS

Artificial Intelligence Agent - AI course term project

Oct 2023 - Dec 2023

- Developed a Python-based agent to play against another player in a game using techniques such as *Monte Carlo Tree Search*, *A* Search* and *heuristics* to efficiently make decisions and win against any opponent; winning top 20% in the class tournament.

Paxos Total Order Game - Distributed Systems project

Nov 2024 - Dec 2024

- Using the Paxos Consensus Algorithm to implement total order for a Java-based multiplayer distributed systems game.

Travel Agency Management System - Database Systems project

Jan 2024 - May 2024

- Developed a Java-based application for a travelling agency, to book flights, hotels or rent cars. Created relational schemas, E/R diagrams, *SQL* queries and *JDBC (Java)* to provide a *database* and functions to navigate and use it.

Compiler - Compiler Design term project

Jan 2025 - May 2025

- Designed and created a full compiler from scratch for Mini-C language (subset of C) using Java and Bash scripts for automation.

SOC-cessful Schedule - Web Development term project

Nov 2024 - Jan 2025

- Designed and created a full-stack website for a booking tool used by school staff and students (*XAMPP stack*, *SQLite3 database*).

McWics Hackathon project - BCV

2025

- Designed a full-stack web-app (*React*, *Drizzle*, *Postgresql*) to improve CV with most relevant experience using Gemini API calls.

EDUCATION

Imperial College London

London, UK

- Postgraduate taught MSc in Computing (Software Engineering)

Sept 2026 - Sept 2027

McGill University

Montreal, QC, Canada

- Bachelor of Science in Computer Science (Artificial Intelligence)
- *Alma Mater Scholarship*, awarded by McGill University in 2022
- Relevant Coursework: Algorithms & Data structures, Artificial Intelligence, Applied Machine Learning, Reinforcement Learning, Software Systems, Operating Systems, Compiler Design, Database Systems, Data Science, Distributed Systems

August 2022 - May 2026

GPA: 3.85/4.0

SKILLS & INTERESTS

Programming Languages: Java, Python, C/C++, Bash, Assembly, SQL, Javascript, PHP, OCaml, WebDev languages (HTML/CSS)

Frameworks & Libraries: AWS, Docker, Git, Pandas, NumPy, Matplotlib, Pytorch, TensorFlow, Scikit-learn, CodeCarbon, SQLite, Zookeeper, TCP/IP, REST APIs, Django, Flask

Languages: English (Native) & French (Native)

Interests & Hobbies: Dance, Piano, Figure Skating, DragonBoat, Basketball, Volleyball, Drawing, Reading, Travelling
